WINDOW AND DOOR SYSTEMS

Tilt And Turn Systems

Tilt And Turn Systems

Having been developed to be compatible with any types of PVC profiles T&T, Tilt and Turn Systems attract attention not only for their original and aesthetic designs but for their excellent sealing pressure as well.

All the systems which may be required in window manufacturing are completely applied through the wide range of T&T products. Other specifications of the T&T tilt and turn systems which provide the manufacturers with cost effectiveness thanks to their assembling convenience: Intervals of use of 480 mm - 2400 mm vertically and 290 mm - 1600 mm horizontally Enhanced safety option for the users thanks to security pin and strikers System components with a high corrosion resistance and surface quality thanks to the silver

alkali zinc coating process Varieties of components suitable for sash weights of 100 kg and 130 kg Vertical, horizontal and double sash application types. Offering practical solutions through its designing in everyday life, T&T, Tilt and Turn Systems keep gaining the satisfaction of both the manufacturers and users.

Windows And Door Handles

Windows And Door Handles

One of the things which first attract attention in living spaces with a high aesthetic level is window and door handles. They must be both decorative and functional.

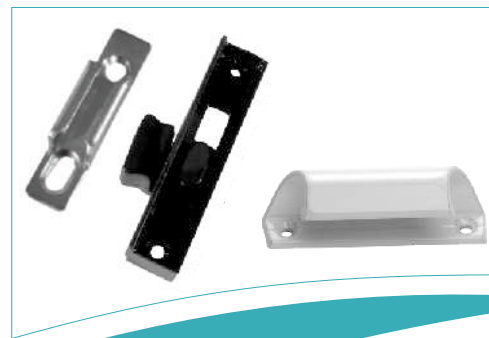

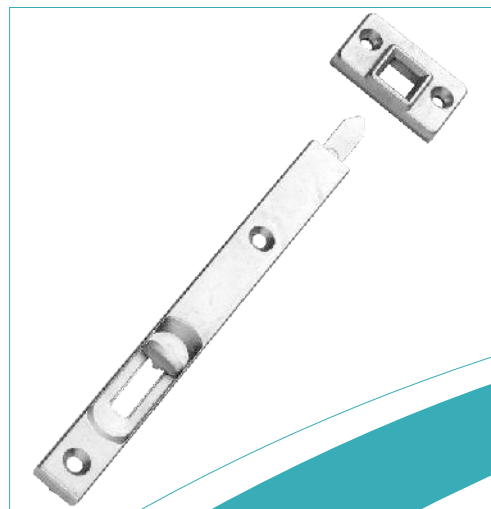

T&T Window and Door Handles complete the value and elegance of all the living spaces where they are used. All the products with easy use and select-looking of T&T which are designed to fit any and all PVC profiles have a long useful life due to their high surface quality.

DECORATIVE AND ERGONOMIC: T&T Window and Door Handles add elegance and aesthetic to windows and doors with different models and varieties which may appeal any taste. Ergonomic designs of industrial engineering placing importance on details provide an experience of easy and comfortable use.

HIGH SURFACE QUALITY: High quality polyester powder coating and plastic components used in T&T Window and Door Handles endure ultraviolet sunlight for many years and prevents discoloration. High surface quality also provides the same result in different colour options.

LONG LIFE: Thanks to special polyacetal gears and gear assemblies, window and door handles are protected against corrosion for many years.

Accosseries

WINDOW AND DOOR SYSTEMS

Accosseries

T&T proves its experience and distinction through both modern and aesthetic and original and practical accessories designed by its specialised R&D team. Quality and easy-to-install T&T accessories compatible with any and all profiles create solutions suitable for all requirements.

Having focused on the satisfaction of the requirements and needs of its customers for 27 years, T&T offers smart and innovative accessory solutions which achieve a high quality standard for windows and doors as a result of its continuous and careful efforts.

All the products manufactured by T&T, which has placed durability, safety and after-sales technical assistance among its indispensable principles, are easy-to-install, versatile and functional. T&T's supplementary accessory alternatives for all window and door systems have successfully passed all the quality tests performed to the European Union and other international standards.

Outstanding Products:

- Adjustable Door Hinges (2D& 3D hinge types)
- Sliding Rollers (Zamak and sheet metal body types developed for sliding doors and windows)
- Sliding Window Handle (Handle with an aesthetic outlook, which is used in sliding doors and windows)
- Door Press Button (Used in balcony/fly net systems, 9-axis and 13-axis types)
- C Handle (Used in sliding window, sliding fly screen and shutter systems)
- Side Lock For Sliding Windows (A design providing an interior locking in sliding door and window systems)
- Striker Bolt (Used to fix one sash in the systems opening on both sashes)

T&T keeps making our life easier through its rational products which it offers, placing particular importance on the concepts of functionality, aesthetics and quality which have gained significance at present.

Espagnolettes

Espagnolettes

T&T espagnolettes with an ever developing product range through R&D activities in order to be able to respond to all the requirements of the customers provide an excellent sealing pressure thanks to their adjustable pins. And the process of silver alkali zinc coating process provides a high corrosion resistance and surface quality.

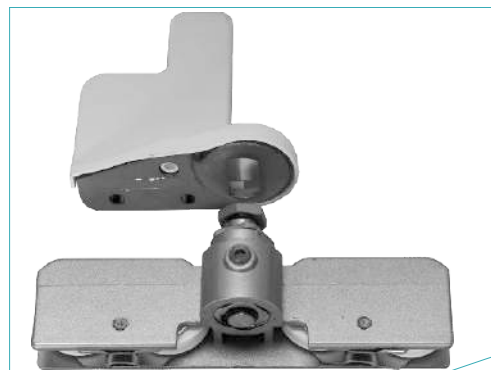

Turn espagnolettes on different axis*
(7,5mm-15mm- 19,5mm-22mm, 25mm, 30mm-40mm)

Sliding espagnolettes*
(with zamak pins and steel pins)

- Turn reversing gear cuttable espagnolettes
- Security espagnolettes
- Espagnolettes developed for outward-opening systems,
- Lockable door espagnolettes**
(85/35-85/28-70/28-70/40-92/35-92/45)
- Automatic locking door espagnolettes
- Lockable door espagnolettes without cylinder (85/35-85/28)
- Sliding locking door espagnolettes Turn and sliding espagnolettes have intervals of use of 250 mm - 2000 mm.

Lockable door espagnolettes have intervals of use of 1600 mm - 2400mm.

Fold And Slide Door Systems

Fold And Slide Door Systems

T&T keeps making your life much easier with its systems which provide energy saving through a high heat and sound insulation; space saving through an ergonomic design and additional safety through strong sealing pressure.

T&T Folding Sliding Door Mechanisms which have been designed with the most precise and advanced engineering techniques by our experienced R&D team are manufactured considering the needs of the end user. Thanks to maximum ease of passage, they provide the most productive use of space.

T&T Folding Sliding Door Mechanisms which are the most elegant way of connecting your living spaces to balconies, terraces and winter gardens create wide spaces, thus bringing the nature to your doorstep. Making your indoor spaces spacious due to its practical use and enhancing your comfort, this system adds an excellent sound and hat insulation to your life as well.

T&T Folding Sliding Door Mechanisms provide the possibility of using in sliding doors and windows with 3 to 6 sashes. Thanks to PVC reels with bearings that have high precision, they provide smooth and gentle sash movements. Minimum threshold height brings the experience of easy use to your doorstep. The system which has no fixed sashes and rails is compatible with any and all profiles thanks to different colour options.

Tilt And Slide Systems

Tilt And Slide Systems

Having been designed for sound and heat insulation which is required by a comfortable living space, T&T Parallel Sliding Systems provide ease of use in the heaviest sashes to which they are applied. Thus they provide solutions suitable for all the requirements of the users through their options of manual and semi-automatic uses.

With such practical and aesthetic solutions, they combine the large spaces of buildings with balconies, terraces or gardens, thus making them even larger and raise the standards of a comfortable life.

Particularly suitable for balcony and terrace doors as well as winter gardens, T&T Parallel Sliding Systems offer the possibility of problem-free use in any and all joinery thanks to their excellent design.

Moreover, they also provide an ease of installation thanks to their drilling and mounting template sets which have been specifically developed.

Positions of use of T&T Parallel Sliding System: **SLIDING POSITION** In this position, once the system has been restored from the tilt position, the sliding sash stays in a parallel manner and is slid sideways.

TILTED POSITION Even though the sash is subjected to a wind load in the tilt position, it maintains its position thanks to upper stay arms.

CLOSED POSITION The central locking system ensures that the sash is locked all around. Moreover, security may be further enhanced by security pins and their strikers.

Shutter Hardware

Shutter Hardware

Decorative and aesthetic outlook is supplemented by shutters in all architectural designs. And safe, aesthetic, easily-mounted and long-lasting shutters are made complete by T&T Shutter Hardware

Aesthetics: With their different sizes and dimensions compatible with any and all materials (wood, PVC and aluminum) used in shutters which allow building to be both safe and good-looking, T&T Shutter Hardware complete the safety with aesthetic details.

Safe: All particulars having been designed with so great a fastidiousness and precision, T&T Shutter Hardware not only provide the windows with some decorative contribution but create a safety system which provides insulation against wind, light and sound through the 5-point locking system which is standard in each product as well.

Long-Lasting: In T&T products, the surface quality requires a firm protection so that it has the minimum damage from the different weather conditions in the outdoor environment. A protective coating is applied to the surface prior to painting against the corrosion of zamak and steel products. Then painting process is completed with high quality powder coating. Furthermore, all the components used for adjustment and assembling are made of stainless steel. Thus, all the products in the T&T Shutter Hardware maintain their firmness in any and all conditions for many years.

Easy Adjustment and Use: T&T Shutter Hardware offer different alternatives with its options of capability of installation in the frame and the wall. Three different adjustments required to be made prior to and after the assembling may be easily carried out by the use of a 5mm Allen wrench
